Project Showcase

Thomson Reuters & Refinitiv - 2018/2019 - Design System - Lead Javascript Engineer - (React)

Leading the development of a company-wide digital design system based on React. Leading a team of 7+ developers across three timezones.

- Mentoring developers on modern development processes, including API design, git workflow and remote working.
- Working with other teams to identify dependencies and resourcing of design implementation
- Implementing the CI/CD and build process for the frontend releases
- Creating business cases & presenting decks to upper management and training other teams
- High-level planning of multiple quarters of work, involving multiple teams stakeholders
- Acting as the point of contact for external agencies utilising the Design System
- Ownership of key projects and knowledge transfer from Thomson Reuters to Refinitiv transition, including FX rates display application and internal tools.

Ladbrokes Coral - 2017/2018 - EPOS Rebuild - Javascript Engineer - (React, Redux, Electron)

Rebuilding Ladbrokes Coral's Electronic Point of Sale system in React and Electron with thorough unit test coverage in place. Managed the UX and development of a number of critical features as well as training new staff including knowledge transfer to the newly built permanent team. Frontend Lead for 1 of 5 scrum teams.

- Rearcited core betting flow from separate flows to one integrated flow
- Implemented realtime race odds
- Implemented offline functionality
- Implemented lottery purchase flow

Johnson Matthey - 2017 - CEO Dashboard - Lead Javascript Engineer - (React, AWS)

Built as a ReactJS SPA with AWS Lambda, we developed a dashboard to Johnson Matthey's reporting software.

- Displaying live graph summaries from main reporting software
- Dynamically generating Powerpoint decks via AWS Lambda for the CEO to use in planning sessions

Silent Conference - 2016 - Order Management System - Lead - (React, Meteor, Twilio, Google Apps)

Built with MeteorJS and React we delivered an events and order management system for an international events company managing tens of thousands of individual products.

- Integration with marketing site lead generation form
- Customer SMS and Email notification system
- Live dashboard and calendars
- Developed efficient order lifecycle integrated with the warehouse workflows

HabitRPG- 2013 - 2014 - Web App - Co-Founder, JS Engineer, Project Management - (AngularJS)

HabitRPG is a web, Android and iPhone app that turns your to-do list into a video game. Earn points for succeeding and lose health for failing at whatever your real-life goals are.

- Helped raise \$40,000 in Kickstarter funding,
- Project Managed the first year of funded development
- Developed JS Chrome Extension for live site tracking

Other Experience**G-Orb Limited – 2014 - 2016 - Consultant General Manager**

We provided training, management, strategy and development to achieve this company's £1 Million yearly revenue goal. We developed both digital and traditional systems and procedures in order to scale the company from 1 employee to 15+.

- Established processes for core business activities in the sales and fulfilment teams
- Researched and integrated core business systems including CRM, VOIP and continuous development
- Developed multiple micro-applications including an auto-quote responder that integrated with the CRM and E-Commerce website.
