- Communication between technical & non-technical staff, Junior training, Knowledge transfer

Project Showcase

Ladbrokes Coral – 2017/2018 - EPOS Rebuild - Frontend Development

With a flavour of Agile Scrum, we developed a new software platform for Ladbrokes Coral staff. The UI is built using React & Electron using latest ES6 features with Redux & immutable, to name but a few. Thorough unit test coverage in place, as well as some E2E integration testing with Spectron. SLConsulting also managed the UX and development of a number of critical features and trained new staff.

Johnson Matthey – 2017 - CEO Dashboard - Lead Frontend Development

Built as a static ReactJS SPA with AWS Lambda server-less functions SLConsulting developed an extension to Johnson Matthey's reporting software.

SDKBackend - 2016 - Order Management System - Project Management & Full Stack Development

Built with MeteorJS, React and MongoDB we delivered events and order management system. Key features include real-time data including calendars and a customer SMS and Email notification system.

HabitRPG– 2013/2014 - Web App - Co-Founder, Frontend Development

HabitRPG is a web, Android and iPhone app that turns your to-do list into a video game. Earn points for succeeding and lose health for failing at whatever your real life goals are.

- Raise its \$40,000 in Kickstarter funding,
- Extensively designed and planned aspects of the app.
- Managed the team
- Developed JS Chrome Extension and worked on the Mobile Apps.

Other Experience

G-Orb Limited – 2014/2016 - Consultant General Manager

We provided training, management, strategy and development to achieve this companies £1 Million Turnover goal. We developed both digital and traditional systems and procedures in order to scale this company from 1 employee to 10+.
